MORBIDITY REPORT

SHORE STATIONS IN CONTINENTAL UNITED STATES

NAVMED 104

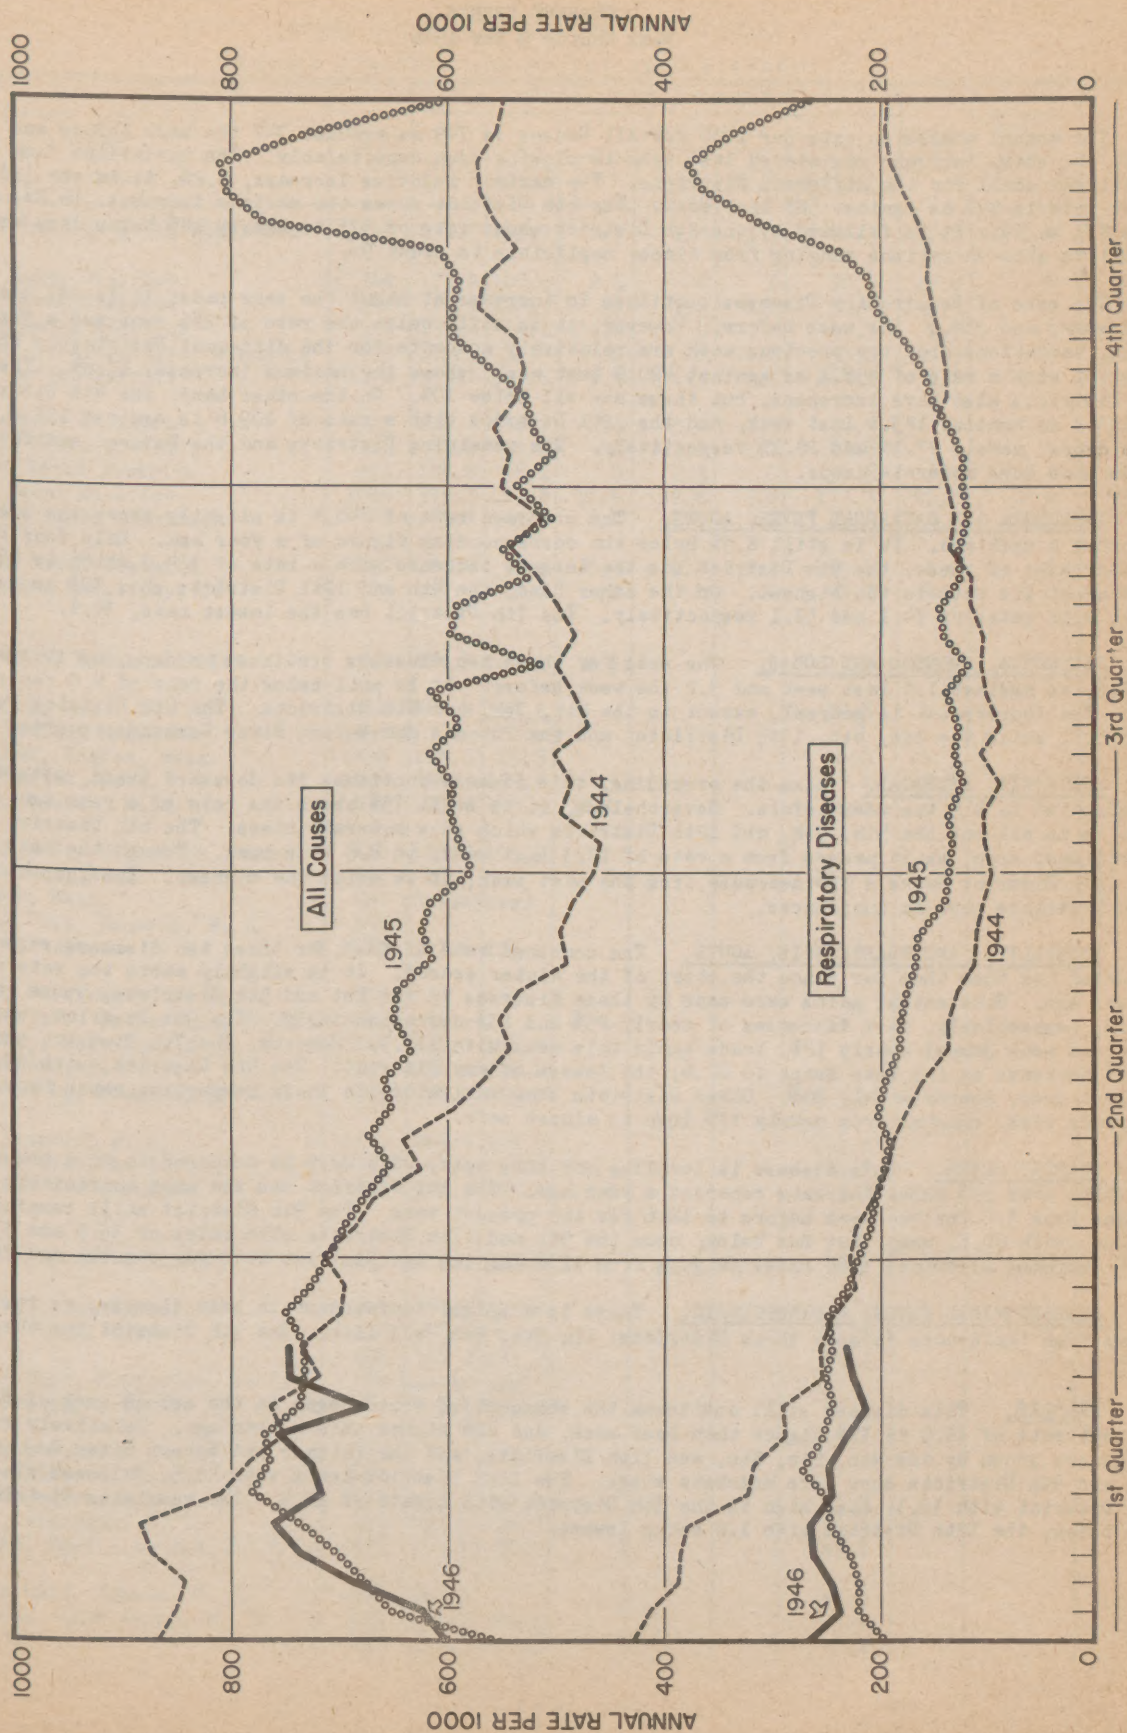

WEEK ENDING 9 March 1946

REPORT NO. 219

RESTRICTED — THE INFORMATION IN THIS REPORT IS NOT TO BE COMMUNICATED
DIRECTLY OR INDIRECTLY TO THE PRESS OR TO ANYONE NOT IN THE ARMED FORCES

ADMISSION RATES—ALL CAUSES AND RESPIRATORY DISEASES

CONTINENTAL LIMITS OF THE UNITED STATES—1944 AND 1945

CURRENT TRENDS
Week Ending 9 Mar 1946

The annual admission rate per 1000 for All Causes is 749 as against 747 the week before and 735 a year ago. Thus, the sharp increase registered last week is slowing down considerably. The variations from last week are relatively small for the different Districts. The maximum relative increase, 9.2%, is in the 3rd District whose rate is 642 as against 588 last week. The 6th District shows the maximum decrease, 16.8%, as it dropped from 871 to 725; it is followed by the 8th District whose rate of 575 is nearly 14% below last week. Other Districts show variations ranging from almost negligible to about 9%.

The rate of Respiratory Diseases continues to increase at about the same pace; it is 231.5 as against 224.3 last week, and 214.0 the week before. However, it is still below the rate of 246 reported a year ago. Here again, variations from the previous week are relatively moderate for the different Districts. Thus, the 5th District with a rate of 495.1 as against 420.9 last week, shows the maximum increase, 17.6%. The 1st, 3rd, and 9th Districts also have increases, but these are all below 10%. On the other hand, the 4th District with a rate of 133.4 as against 183.6 last week, and the 12th District with a rate of 109.6 as against 138.2, show the maximum drops, namely 27.3% and 20.1% respectively. The remaining Districts and the Potomac and Severn River Commands show more moderate drops.

INFLUENZA AND CATARRHAL FEVER, ACUTE. The combined rate of 140.4 is slightly above the one of 136.3 reported a week ago. It is still 8.5% below the corresponding figure of a year ago. Only four Districts show an increase; of these, the 5th District has the largest increase with a rate of 324.0 which is 15.5% above last week; its rate is the highest. On the other hand, the 4th and 12th Districts show 32% drops from last week, with rates of 74.1 and 57.1 respectively. The 7th District has the lowest rate, 38.8.

PNEUMONIA, BRONCHO AND LOBAR. The rate for these two diseases continues to drop, as it reached the value of 1.3, as against 1.8 last week and 3.2 the week before. It is well below the rate of 4.0 reported a year ago. The improvement is general, except in the 6th, 7th, and 8th Districts. The 6th District leads this week, with 5.0, while the 1st, 4th, 13th Districts, and the Potomac and Severn River Commands reported no incidences.

PNEUMONIA, ATYPICAL. Like the preceding, this disease continues its downward trend, with a rate of 3.5 as compared to 4.9 the week before. Nevertheless, it is still 75% above the rate of a year ago. The improvement is in all but the 5th, 9th, and 12th Districts which show moderate rises. The 6th District has the most significant drop, as it passes from a rate of 12.3 last week, to 2.5 this week. Though the rate of 9.6 for the 11th District marks a 35% decrease from the past week, it is still the highest. The 1st, 4th, 8th, and 13th Districts have no incidences.

TONSILLITIS AND PHARYNGITIS, ACUTE. The combined rate of 86.3, for these two diseases surpasses all those reported for them thus far since the start of the winter season. It is slightly above the rate of 85.0 reported a year ago. Substantial gains were made by these diseases in the 1st and 5th Districts, whose rates, 70.4 and 164.2, respectively, mark increases of nearly 25% and 23% correspondingly. The 9th District, whose rate of the previous week jumped nearly 12%, leads again this week with 177.3. However, the 7th District shows better than a 41% decrease as its rate drops to 22.6, the lowest of any District. The 4th District, with 59.3, has the next largest drop, approximately 20%. Other Districts show variations in their respective rates from those of the previous week, ranging from nearly 17% down to almost zero.

SCARLET FEVER. This disease is leveling off this week, with 22.5 as compared to 22.4 the week before. It is still over 30% below the rate reported a year ago. The 1st District has the most appreciable increase, as it passes from 3.5 for the week before to 12.6 for the present week. The 9th District still remains far above the others, with 80.8; next, but far below, come the 5th and 11th Districts with rates of 39.5 and 33.8 respectively. The remaining Districts show rates ranging from 12.6 for the 1st District to 0 for the 6th and 7th Districts.

CEREBROSPINAL FEVER, MENINGOCOCCIC. There is a slight improvement in this disease, as its rate of 0.4 comes from incidences in only three Districts: the 5th, 9th, and 11th. The 9th District has the highest rate, 2.2.

MEASLES. This disease still continues the sharp climb which began in the second week of February. Its present rate of 18.5 is 31% higher than last week, and 42% higher than a year ago. Relatively substantial gains are shown by the 4th, 5th, 8th, and 11th Districts, and the Potomac and Severn River Commands, while the 6th and 9th Districts show more moderate rises. The 11th District leads with 40.5, followed closely by the 9th District with 39.3; also high is the 5th District with a rate of 28.4. The remaining Districts are rather far below, the 12th District with 1.0 being lowest.
